Advanced Topics in ML: Presentation Slides Guidelines

The presentation should clearly communicate the essence of your work's through **visuals (diagrams, tables, plots, etc.) and with concise text**.

Your project presentation should be included:
1. Title Slide including the name of the course, lecturer, and team members' names
2. The problem you're addressing
3. Original goals of your project.
4. Other methods/techniques used with respect to the problem's domain
5. Dataset and a short list of features
6. Methodology: algorithm and technique names and why you initially thought they were suitable for the task at hand.
7. Show a concise description of the experiments and the techniques used to evaluate them
8. Show the results in tables or other clear visual format (plots for example)
9. Comparison of the techniques used
10. Conclusion - should be insightful and to the point!

Good Luck!
